Innoventek Inc

Is there a way to **FREEZE** the amount of **CO₂** in the earth's atmosphere, without rendering the present transportation infrastructure obsolete?

Nobel Laureate chemist George Olah has already written a book on ***The Methanol Economy!***.

If a completely Green source of Renewable Energy becomes available, such as **hyper-efficient Solar Energy**, then atmospheric **CO₂** plus water can be converted to methanol as a replacement for gasoline.

But the **CO₂** released by combustion of the methanol merely replaces that taken out to produce it!

So the total amount of **CO₂ remains unaltered!
And concern re **Global Warming disappears!****

Innoventek Inc

There is online incontrovertible **EVIDENCE** that a “**Magic Bullet**” solution to the

FREE Renewable Clean Energy problem was **demonstrated** before Nobel Laureate physicists & chemists, 1923-1940, but was **lost** because the USPTO mistakenly said “**a cold cathode is physically impossible**” and **denied** a Patent to T. H. Moray’s “**germanium triode**” until his rejected Application led to the announcement of the **Transistor** in 1947 and Nobel Prizes to the subordinates of the man who seemingly had betrayed Moray’s confidences 1923-1940. **For details see:**

Innoventek Inc

STARTLING new development!

- **Public Domain**, miniaturized partial rediscovery of Lost Secret of Moray Device, now confirmed by 4,000 hobbyists!
- \$49.00 DIY Manual by Hungarian engineer Lewis Holtman enables FREE Energy 24/7/365 regardless of weather, using a 16-foot antenna & parts from Radio Shack costing less than \$100.00!!!
- BUT Holtman device provides only 2.5 Watts.
- Using equations from his expired BYU Topolotron Patent, Bob Bass knows how [using **hellaciously complicated** algebra] to analyze the **Fitzgerald/Tesla/Schumann Resonances** in the **Earth-Ionosphere Cavity** (an INDIRECT form of Solar Energy) and submit an ALLOWABLE Patent on the “non-obvious” improvement of the Holtman device by a FACTOR of 20,000 to equal Moray’s 1926 demonstrations of **50,000 Watts of AC power** with a **78 foot antenna** and a ground and a small box of primitive crystal-radio-set era electronics.

Innoventek Inc

• Phase	DELIVERABLES	COST (LABOR & EXPENSES)
•		
•		
• 1	ElectroMagnetoSonic Waves Closed-Form Solution	\$ 80 K
•		
• 2	New Model of FitzGerald/Tesla/Schumann Resonances	\$ 40 K
•		
• 3	Design Antenna & Receiver System & Circuitry	\$ 40 K
•		
• 4	Assemble Prototypes & Verify Operability & Scalability	\$ 30 K
•		
• 5	Draft & Negotiate at USPTO & Submit Patent Application	\$ 10 K
•		-----
•		
	TOTAL	\$ 200 K

Innoventek Inc.

Our **SECRET WEAPON** assuring success!

BYU Physics Professor **Bob Bass** not only
passed the Patent Bar Exam in 1978,.

BUT then he took more & more advanced and more & more expensive Short Courses from famed Patent Law Professor Irving Kayton, ending up with Kayton's MOST ADVANCED and MOST SECRET "insider" trick, enabling the savvy Patent Agent to get a Patent **ALLOWED** in "**Two Weeks!**" instead of the usual two years!

When Bass used this trick on his 1984 **Plasmasphere** Patent application, it worked!

Innoventek Inc.

EQUITY offer & One-Year Exit Strategy

88.8% Equity in putative Patent Application to first entity providing \$200K cash Seed Funding to Innoventek Inc. for **Moray Rediscovery Project**.

2.2 % Equity Finder's Fee to entity which provides Seed Funder introduction that results in actual funding.

When USA Patent is **ALLOWED**, simply **announce** Public Demo **convinced** Expert Skeptics: a sensation like that of the March 23, 1989 announcement of Cold Fusion will cause terrified giant companies which stand to lose greatly to voluntarily attend a Public **Auction** of Exclusive 20-Year Patent License in the USA alone [and the USA Intellectual Property Laws will prohibit importation of foreign versions].

Innoventek Inc.

Evidence of REALITY, not merely HYPE!

Bass **EMTFD** (**ElectroMagnetoThermoFluidDynamic**) **Equations** yield complex frequency ω as the root of a polynomial of 6th degree which factors into the product of three quadratic polynomials, two of which are **already known** [the “fast” & “slow” ***MagnetoSonic Waves of Alfven***], for which Alfven won a Nobel Prize. But the hitherto unknown Bass ***ElectroMagnetoSonic*** Waves are sure to win Bass a Nobel Prize also, as soon as their practical importance is demonstrated!
